

Govind Kumar

MERN Stack Developer | Full Stack Developer | React.js Developer

+91 7905205343 | govind010119@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Full Stack Developer with **3.6 years of experience** building scalable web applications using React.js, Node.js, Express.js, MongoDB, and MySQL. Contributed to **9+ web applications**, developed REST APIs, and integrated **100+ API endpoints**. Experienced in reusable React components, state management, database integration, real-time features, and frontend–backend development.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Redux, Context API, React Router, Material UI, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, Authentication, API Integration

Databases: MongoDB, Mongoose, MySQL, Sequelize, DynamoDB

Cloud & Tools: AWS Lambda, API Gateway, AWS S3, Git, GitHub, Postman, DBeaver, VS Code

Additional: Socket.io, JWT, State Management, Debugging, Lazy Loading, Code Splitting, Memoization

PROFESSIONAL EXPERIENCE

India Infosoft Pvt Ltd

Feb. 2021 – Present

Full Stack Developer

Greater Noida

- Developed and maintained full-stack web applications using Node.js, Express.js, React.js, MongoDB, and SQL.
- Designed and developed RESTful APIs using Node.js and Express.js, implementing business logic, authentication, validation, CRUD operations, and API integrations.
- Worked extensively with MongoDB and SQL databases, designing schemas, writing queries, managing relationships, and implementing database-driven features.
- Built and integrated backend services with React.js applications, handling API communication, data management, and application state using Redux and Context API.
- Developed reusable backend modules, middleware, controllers, and API services to improve code maintainability and scalability.
- Debugged and resolved backend, database, API integration, and frontend issues while collaborating with developers to deliver production features.

Script Space Journals Pvt Ltd

Aug. 2024 – Jan. 2025

MERN Stack Developer

Panchkula, Haryana

- Delivered full-stack features across **3 web applications** using React.js, Node.js, Express.js, and MongoDB.
- Created **30–40 React components per project**, reducing duplicate frontend code by approximately **25%**.
- Developed **20+ REST APIs** and integrated **40+ endpoints**, improving frontend–backend data handling by nearly **20%**.
- Collaborated with a development team of up to **6 members** to implement features, test API workflows, and resolve frontend–backend integration issues.

ZonSource IT Solutions Pvt Ltd

Feb. 2023 – Jul. 2024

React.js Developer

Delhi

- Implemented **50+ responsive pages** across **4 React.js projects** from provided UI/UX designs.
- Centralized application state with Redux and Context API, reducing repeated state logic by approximately **20%**.
- Optimized live market-data rendering using memoization, lazy loading, and code splitting, reducing loading delays by nearly **30%**.
- Reduced page-load delays and improved live market-data rendering on a trading learning platform using **memoization, lazy loading, code splitting, and React rendering optimizations**.

PROJECTS

Trading Lounge – Trading Learning Platform | React.js, Node.js, Express.js, MongoDB

- Enhanced a learning platform covering **4 asset categories** and integrated live market-data APIs.
- Accelerated chart and live-data rendering, reducing display delays by approximately **30%**.
- Established authentication and session handling for user-specific trading simulation features.

Article Publication Platform | React.js, Node.js, AWS Lambda, DynamoDB, S3

- Architected User and Admin panels supporting **4 publication stages**: submission, review, approval, and publication.
- Engineered serverless Node.js APIs with AWS Lambda and API Gateway, improving API response handling by nearly **20%**.
- Structured DynamoDB records and AWS S3 file storage, reducing manual data and document handling by approximately **25%**.

Real-Time Cab Booking Application | React.js, Node.js, Express.js, MongoDB, Socket.io

- Automated booking flows for riders, drivers, ride requests, and trips, reducing manual booking steps by approximately **25%**.
- Constructed REST APIs for users, drivers, bookings, and trip records using Node.js and Express.js.
- Enabled real-time rider–driver updates with Socket.io, reducing booking-status delays by nearly **30%**.

EDUCATION

Mahatma Gandhi Kashi Vidyapith

Bachelor of Computer Applications (BCA)

Aug. 2018 – May 2021

Varanasi, Uttar Pradesh
